

INSTALL DEMO SOFTWARE

7/16/2013

The "**DEMO**" software can be downloaded from our website.

1. The program can only be installed on **Windows** platform. Cannot be installed on **Mac OS, Android**, etc
2. Security Blocking - adjust your computer's security configuration as required to allow download
3. The program will be installed on your computer's hard drive as C:/Toviga (Unless you specify otherwise)
4. Installation process will only complete once you have:
 - a. agreed to the Licensing Agreement
 - b. entered the password **TovigaDemo** (case sensitive)
5. Two icons will automatically be placed on your desktop:
 - a. Toviga Player
 - b. Uninstall Toviga Player (so you can completely remove the game any time from your computer)
6. The Toviga demo game is set up for a screen resolution of **1024 x 768**
 - if you do not adjust your screen resolution, the images will appear a bit fuzzy or jagged
 - for sharper images, temporarily reset your screen resolution to 1024 x768
7. If you have a "wide screen" monitor, the game image will be in the center of your screen (will not fill the screen)
 - because the games are formatted for standard touchscreens, you will have bands on either side of game screen
8. In the **commercial** version, the first 5 pages are examples of how we can **customize** your screensaver pages:
 - logo, product information (static images or animation).
9. If you click on any opening logo or screensaver page, game goes directly to main menu.
10. There are currently 6 games - 3 more are completing development.
11. Playing these games is "intuitive" for young children - therefore no need for written instructions.
12. To exit the game, hit **Control/Q**
13. Game will automatically load up on computer "re-start". Close with **Control/Q**. Uninstall demo if not needed.

For questions or concerns please contact us.
